From the Desk of Tom Kimmel

I am pleased to announce that we have all survived the year and I hope that you, our loyal customers, have, likewise survived. At times I thought there was more danger from political altercations than there was from a virus infestation or two. Strangely, it was a very good year for the nursery with next year—2021 appearing to be equally as good, and equally as strangely.

As for reassurances, our plant inventory is chock full—production continued apace all last summer, and will continue all winter until there is no more room in the poly houses. Do not conclude that any plant shortage means that this will continue. We are pretty sharp over here in the Heartland of America and are cognizant of lost sales and then do everything we can to correct that problem.

The alert student of plant catalogs will note that we have dropped most of the perennial plants with fewer than 500 gallons sold per year, and we have dropped the problematical groundcovers—Aegopodium, Houttuynia, Hypericum, Lamium, and Waldsteinia. As soon as we clean out our stock bed, Convallaria will be dropped. The cynical may conclude that our conscience is starting to show the closer we are coming to meeting our Maker.

Meanwhile we are adding new plants all of the time—Chicagoland Grows and Intrinsic Perennials patented varieties while buying in patented plugs and making Proven Winners® varieties for our garden center customers. Which reminds me that our plant quality and plant care are improving sufficiently that we now welcome the retail trade to our existing landscaper trade.

Given our druthers we prefer large custom grow landscape jobs and any perennial liner sales. In the meantime we are doing everything that we can to saturate the market for Pachysandra ‘Green Carpet’ and Vinca ‘Bowles’.

On a personal note, I have retired for the second time, devoting my energies now to writing books on modern steam power and how it is going to save the world. I maintain an intellectual interest in the nursery, planning for its financial health and its continuity of management. Mostly I cruise around once a week or so telling everyone to work harder. That is what got us where we are today, I am going to continue the program. Thanks to our customers for working hard also.

Groundcovers

RECOMMENDED PLANT SPACING:

<u>Spacing</u>	<u>Common plant sizes</u>	<u>Square feet per plant</u>
6" centers	32ct.	.25 sq. ft.
8" centers	32ct.	.44 sq. ft.
10" centers	32ct., 24ct., 18ct.	.69 sq. ft.
12" centers	32ct., 24ct., 18ct., 10ct.	1.00 sq. ft.
15" centers	18 ct., 10ct.	1.56 sq. ft.
18" centers	#1 container	2.25 sq. ft.
24" centers	#1 container	4.00 sq. ft.

Generally, groundcover plants are spaced 6-12" apart. The distance between the plants is based on the size of the plants used, the expected growth rate, and the budget that the installer has to work with.

$$\text{sq. ft. of job} \div \text{sq. ft. per plant} = \text{number of plants required}$$

Example: 1,000 square feet using 32ct flats planted on 6" centers

$$1,000 \text{ sq. ft.} \div .25 = 4,000 \text{ plants}$$

$$4,000 \text{ plants} \div 32 = 125 \text{ flats}$$

Ajuga**Zone 3/4-10**

Bugleweed, Dwarf Bugleweed

Forms a dense mat that covers a large area quickly. The flower spikes contain numerous bugle-shaped flowers that are bluish-purple. Needs at least moderate moisture.

Foliage

'Chocolate Chip'	chocolate	2-4"	Z4	May-Jun
reptans 'Black Scallop' (PP# 15,815)	dk maroon purple	4-6"	Z4	Apr-May

24ct Standard 1.12 (26.88/flat)

10ct..... 1.85 (18.50/flat)

#1 container..... 4.85

All varieties are not maintained in all sizes, but can be grown upon request.

Anemone - See Perennials Section

See the [Perennials Section](#) for our selection of *Anemones*, especially the native varieties *canadensis* and *sylvestris*, which make excellent groundcovers.

Arctostaphylos**Zone 2-6**

Bearberry, Kinnikinnick

Loves dry, sunny, and acidic hillsides. An evergreen that grows as a groundcover or low-growing shrub. Spring flowers mature to red berries. Illini Beauty™ reportedly grows better in less acidic soil.

uva-ursi 'Massachusetts'	white w/ pink	6-12"	Apr-May
Illini Beauty™ (uva-ursi 'Morton', PPAF)	white w/ pink	6-12"	May-Jun

32ct..... 1.53 (48.96/flat)

#1 container..... 7.05

Production for both cultivars is limited for 2021.

Asarum**Zone 3-8**

Canadian Wild Ginger

Canadian wild ginger makes a gorgeous woodland groundcover and prefers an acidic, moisture-retentive soil. The large, herbaceous, gray-green leaves are somewhat fuzzy.

canadense	brownish red	6-12"	Apr

Carex - See Grasses Section

Carexes, commonly called Sedges, are becoming increasingly popular as groundcovers and lawn alternatives. Twixwood offers many of these grass-like plants. See our [Grasses Section](#) for the complete list.

Ceratostigma**Zone 5-9**

Plumbago, Leadwort

Intense clusters of peacock-blue flowers cover this vigorous, mat-forming groundcover over a long period of time. In fall, foliage turns deep mahogany while the flowers keep opening for a beautiful contrast. Best color is in full sun.

plumbaginoides	blue	8"	Jul-Sep

#1 container.....	5.40		

Convallaria**Zone 3-8**

Lily-of-the-Valley

Intoxikatingly fragrant, bell-shaped flowers that are excellent as cut flowers. Lily-of-the-Valley is hardy, trouble-free, and long-lived. Makes a superb groundcover for shady, moist areas.

majalis	white	6-8"	May-Jun
32ct.....	.87 (27.84/flat)		
10ct.....	2.10 (21.00/flat)		
#1 container.....	5.40		

Dianthus - See Perennials Section

Many *Dianthus* species make excellent groundcovers especially in rock gardens and miniature settings. Check out our [Perennials Section](#) for a complete list.

Euonymus**Zone 4-10**

Wintercreeper, Purple Leaf Wintercreeper

***Euonymus* is a hardy evergreen spreader that is great for erosion control. Foliage turns purple in the fall. Not available for sale to Indiana.**

Galium

Zone 4-8

Sweet Woodruff, Bedstraw

One of the best herbaceous groundcovers for a partially shaded, moist area. Formerly classified as *Asperula oderata*. Vigorous and hardy, the myriad of small white flowers appear in May and June over lovely green foliage. Prefers a light, acidic soil.

Leptinella **Zone 6-10**Black Brass Buttons 

A miniature groundcover native to New Zealand with soft fern-like foliage which is dark bronze to black. Flowers are insignificant. Can handle moderate foot traffic.

'Platt's Black' yellow 3" Jun-Jul
 10ct..... 2.10 (21.00/flat)

Liriope **Zone 4/6-10**Lily Turf 

Dense spikes of lavender flowers above foliage. Useful in borders and mass plantings. Prefers some shade, but is full-sun tolerant. 'Big Blue' and the other members of the *muscaria* species have a mounding habit, while the *spicata* species are more spreading. ONLY the *spicata* species is hardy into northern Illinois and central Wisconsin.

Sedum	Native	Zone 3/4/5-9
Stonecrop		 

Succulent-type perennials that prefer sunny, hot areas in a loose soil with good drainage. *Sedum* are especially susceptible to variations in color, habit, height, etc. depending on growing conditions, light, temperature, etc. They may change color frequently throughout the season. For example, ‘Angelina’ can be pale yellow to green if it is in shade or over-fertilized. In the heat of the summer it will be bright golden yellow. While in the cold or if stressed with too little water it will be dark orange with red highlights.

The *Sedum* genus is so large it is being subclassified or reclassified. As these come into general use, Twixwood will note them as alternate names. Other genus or subgenus names you will see include *Hylotelephium*, *Petrosedum*, *Phedimus*, *Rhodiola*, and *Sinocrassula*.

All varieties are not maintained in all sizes, but can be grown in these and other sizes upon request.

'Tidal Pool' (PP# 23,341) is maintained as field stock and can be grown upon request.

Vinca	Zone 4-9
-------	----------

Periwinkle, Myrtle

An evergreen groundcover that is hard to beat for dry, shady areas under trees. Prefers acidic soil and part shade. 'Bowles' is more clumping in habit and has more profuse flowering than the species. 'Dart's Blue' is similar to 'Bowles', but seems to be more disease resistant. 'Ralph Shugert' has variegated foliage.

minor 'Bowles'	blue	6-8"	May-Jun
m. 'Dart's Blue'	blue	6-8"	May-Jun
m. 'Ralph Shugert'	blue	6-8"	May-Jun

32ct..... .82 (26.24/flat)

Grasses and Grass-like Plants

RECOMMENDED PLANT SPACING:

<u>Spacing</u>	<u>Common plant sizes</u>	<u>Square feet per plant</u>
6" centers	32ct.	.25 sq. ft.
8" centers	32ct.	.44 sq. ft.
10" centers	32ct., 24ct., 18ct.	.69 sq. ft.
12" centers	32ct., 24ct., 18ct., 10ct.	1.00 sq. ft.
15" centers	18 ct., 10ct.	1.56 sq. ft.
18" centers	#1, #2, #3 container	2.25 sq. ft.
24" centers	#1, #2, #3 container	4.00 sq. ft.

Generally grasses are spaced 12-24" apart, sometimes farther for the larger varieties. The distance between the plants is based on the size of the plants used, the expected growth rate, and the budget that the installer has to work with.

$$\text{sq. ft. of job} \div \text{sq. ft. per plant} = \text{number of plants required}$$

Example: 1,000 square feet using 32ct flats planted on 6" centers

$$1,000 \text{ sq. ft.} \div .25 = 4,000 \text{ plants}$$

$$4,000 \text{ plants} \div 32 = 125 \text{ flats}$$

Ammophila	Native	Zone 5-10
------------------	---------------	------------------

American Beach Grass, Dune Grass, Marram Grass

A leafy, spreading grass native to North America's sandy beaches and dunes. Commonly found around Lake Michigan. Wind and salt tolerant, but cannot withstand regular foot traffic.

breviligulata green 30" Jul-Sep

32ct..... 1.31 (41.92/flat) Other sizes can be grown upon request.

Andropogon	Zone 4-10
-------------------	------------------

Big Bluestem

The species is a native with lush green foliage that turns a rich orange and copper-red in the fall. 'Black Hawks', bred by Brent Horvath of Intrinsic Perennial Gardens in Chicago, Illinois, features dark green foliage with purple highlights that turn almost black.

gerardii 'Black Hawks' (PP# 27,949) green/purple to black 60-72" Sep-Nov

18ct..... 2.60 (46.80/flat)

#1 container..... 7.05

Other sizes can be grown upon request.

'Dancing Wind' (PP# 26,892): Twixwood has started production of this cultivar. May have limited or late availability in 2021.

Bouteloua	Native	Zone 3/4-10
-----------	--------	-------------

Grama Grass, Side Oats Grama, Blue Grama, Mosquito Grass

A warm season grass that is very drought tolerant. The Side Oats Grama common name refers to the *curtipendula* species, which has oat-like seed pods that hang along one side of the stem. The *curtipendula* species is less hardy (only zone 4) and has green foliage that turns golden with hints of orange and red in fall. Flowers are purplish spikelets that turn straw color.

The *gracilis* species (commonly called Blue Grama or Mosquito grass) that Twixwood grows, originally came from the Bad River area of South Dakota as a recognized genotype. *B. gracilis* leaves are more blue in color and the seeds hang down from horizontal seed spikes at the tip of the stem, looking like hovering insects. 'Blonde Ambition' is a new cultivar with striking golden-blond seed heads which make a beautiful show, especially in mass plantings. Well-drained soil is especially critical for winter survival in the North.

curtipendula	green purple	12-20"	Z4	July-Aug
gracilis (Bad River Genotype)	bluish purple	9-18"	Z3	June-Aug

18ct..... 2.10 (37.80/flat)

Carex	Native	Zone 3/4/5-8
Sedge		

Sedges are becoming increasingly popular as groundcovers, or lawn alternatives, as well as accent plants. Twixwood continues to add varieties as we find ones that perform well and for which there is a demand. There is a wide variety of shade/sunlight tolerance, hardiness zones, colors, and growth habits. The cultivar descriptions are on subsequent pages.

Varieties are separated by price and continue to subsequent pages.

C. albicans (White-tinged or Oak Sedge) is native to most of America east of the Rockies and usually found in dry, upland forest settings. Narrow, bright green blades form 15-20" tufts.

C. amphibola (Creek Sedge or Eastern Narrowleaf Sedge) is native to the deciduous forests of much of the Eastern US into the South and Southern prairie states. It is often found on the slopes rising from streams. Fountain shaped clumps of narrow foliage. Does have a tendency to reseed.

C. appalachica (Appalachian Sedge) is a native found predominantly in dry deciduous forests & clearings.

C. bicknellii (Prairie Sedge) so-called because it grows out in the open, full sun and can do well in drier situations than most other sedges. It is also one of the taller native sedges.

C. blanda (Common Wood Sedge) is a very versatile native able to handle both sun and shade as well as most soil types. Spreads by rhizomes so can be an aggressive Carex to fill in empty spaces.

C. brevior (Plains Oval Sedge) is a versatile native for sun to part shade that can take wet to dry soils. Small, green oval spikelets turn into brown, prickly seed heads. Formerly known as *Carex festucacea* var. *brevior* and also known by the common name of Shortbeak Sedge. Very similar to *C. molesta*.

C. eburnea (Bristle-Leaved, or Ivory, or Ebony Bristleleaf Sedge) likes drier, sandy soils and limestone outcroppings. Native from Newfoundland to Alaska and south into Texas and Alabama.

C. elata 'Aurea' (Bowles' Golden Sedge) is a distinct cultivar that has golden leaves with thin green margins. Will grow in 2-3" of water but won't tolerate drought. Best color is in full sun with continually moist soil.

C. emoryi (Emory's or Riverbank Sedge) is a native wetland sedge with long white seed heads that turn to brown crown-like tips over the course of blooming. It is considered endangered in New York.

C. 'Evergold' (Evergold Sedge) is a Japanese cultivar usually considered a member of the *oshimensis* species but sometimes assigned to *hachijoensis* or even *morrowii*. Narrow creamy-white to yellow cascading leaves with deep green margins. Prefers partial sun and moist soil, but will tolerate other conditions and even deer.

C. flacca (Blue or Blue-Green Sedge) is synonymous with *C. glauca* referring to the blue colored leaves. This native prefers moist soils, even 1-2" of standing water, but established plants can possibly even handle a bit of drought. Prefers some shade.

Carex (continued)

C. flacca 'Blue Zinger' (Blue Zinger Sedge) is a cultivar selected for its striking blue foliage. Grows slightly taller than the species, but otherwise similar.

C. 'Ice Dance' (Ice Dance Sedge) is a common variegated cultivar with dark green leaves edged with a very distinct, bright white stripe down each side. Sometimes considered a *morrowii* species. Moderate spreader that prefers moist soil and has best color in shade. May benefit from a winter mulch in northern climates.

C. jamesii (James' Sedge) is a native sedge with bulbous seed heads and a stem appearing between spiked leaves. Considered threatened in Minnesota and New York, and endangered in New Jersey.

C. lacustris (Lake Sedge) is native to most of the Northern US. Found in areas near water including, but not limited to, lake shores & wetlands.

C. muskingumensis (Palm Sedge) a native found in areas of temporary standing water.

C. pellita (Woolly or Broad-leaved Woolly Sedge) is native to most of the US. Also known as *C. lanuginosa*. Prefers full to partial sun and wet to moist conditions.

C. pennsylvanica (Pennsylvania Sedge) is one of the most popular sedges particularly as a shade area groundcover due to its slow spreading nature. One of the few sedges that prefers well-drained soil. A Roy Diblik favorite that he says may one day replace *Pachysandra*. Native to the Northeast and as far south as Mississippi and Georgia.

C. radiata (Eastern Star or Straight-Styled Wood Sedge) is native to Eastern North America from Newfoundland to Georgia. Prefers wet to moist soils in part shade. Very similar to *C. rosea*.

C. rosea (Rosy Sedge) is native to eastern America and into Canada. Blooms with clusters of thick spikes.

C. sprengelii (Long Beaked or Sprengel's Sedge) is a very hardy native from Alaska to Delaware to New Mexico. Prefers moist to wet soil.

C. stricta (Tussock Sedge) tolerates some sun, but prefers wet soils even growing in areas prone to seasonal flooding. Native to most of eastern North America.

C. vulpinoidea (Fox Sedge) prefers very wet soils and full sun. One of the most common native sedges. The seed heads resemble a fox's tail, but don't last long.

Carex (continued) - Field Stock For Custom Grow

C. hystericina (Porcupine or Bottlebrush Sedge) is a wetland sedge with fine leaves. Native to most of North America except the deep south.

C. pensylvanica 'Straw Hat' was selected by Brent Horvath of Intrinsic Perennial Gardens for its very prominent yellow flowers.

C. plantaginea (Seersucker Sedge) has very wide leaves (1") compared to most of the other sedges we grow. It is native to the northeastern US.

All varieties are not maintained in all sizes, but these and other sizes can be grown upon request.

Hakonechloa	Zone 5-9
--------------------	-----------------

Japanese Forest Grass, Hakone Grass	
-------------------------------------	---

A slow spreading, highly ornamental grass that prefers part shade or cool, moist sites. The species is hardier and more adaptable than the named varieties. ‘All Gold’ has solid golden-yellow leaves. ‘Aureola’ is variegated with gold striped leaves and was the 2009 Perennial Plant of the Year. Cool weather adds pink highlights to the foliage.

m. ‘All Gold’	gold	12-18”	Jul-Aug
m. ‘Aureola’	gold striped	12-18”	Jul-Aug
#1 container.....	9.25		

Helictotrichon	Zone 4-8
-----------------------	-----------------

Blue Oat Grass	
----------------	---

Steel blue blades resemble Fescue, but much larger. ‘Sapphire’ is bluer, has wider leaves and is more disease resistant than the species.

sempervirens ‘Sapphire’ (Saphirsprudel’)	blue/bluish brown	24-36”	Jun
#1 container.....	8.20		

Imperata	Zone 5-9
-----------------	-----------------

Japanese Blood Grass	 
----------------------	---

A slow spreading grass. Emerges green and becomes blood red by fall. The species is considered invasive and banned in many areas. ‘Red Baron’, also known as ‘Rubra’, is shorter, less aggressive, and rarely flowers so it does not self-seed. It is still restricted. Twixwood maintains licensing to sell in several states. Requirements vary, but typically the product cannot be resold or transported out of the state we sell to.

Currently available for the following states: MI, IL, IN, WI, OH, NE, CT

[Liriope - See Groundcover Section](#)

Miscanthus**Zone 5-9**

Chinese Silver Grass, Maiden Grass, Eulalia Grass, Japanese Silver Grass

Miscanthus have been standard ornamental grasses for many years. *Miscanthus sinensis* cultivars are generally considered hardy to Zone 5.

Many varieties can heavily self-seed leading many to consider *Miscanthus* borderline if not invasive. For example, check out the study done by the Chicago Botanic Garden: https://www.chicagobotanic.org/sites/default/files/pdf/plantevaluation/no43_ornamental_grasses.pdf. Twixwood recommends substituting natives and nativars such as *Panicum* and *Schizachyrium* varieties whenever possible.

‘Gracillimus’ is the standard Maiden Grass with narrow green leaves, a silver midrib, and feathery bronze-red seed blooms that turn silver in winter.

‘Little Kitten’ is an extremely dwarf *Miscanthus* with narrow green leaves and silvery plumes.

‘Morning Light’ has narrow leaves with white variegation on the margin. Reddish flower plumes turn silvery.

s. ‘Gracillimus’	grn & silver bronze	48-84”	Aug-Nov
s. ‘Little Kitten’	green white	12-36”	Aug-Nov
s. ‘Morning Light’	grn & white red-wht	48-60”	Aug-Nov

Panicum	Native	Zone 5-9
Switch Grass		

Switch Grasses are a native prairie staple. The *virgatum* species has green, 3' foliage with pinkish tinged flower panicles that rise to 6'. Foliage turns yellow in fall.

'Heavy Metal' features 3' columnar clumps of metallic blue leaves that turn yellow in fall. Pink tinged blooms extend to 5'.

'Northwind' is one of the best vertical forms of Switch Grass. Leaves are olive to bluish-green and flowers are yellow. A Roy Diblik selection.

Ruby Ribbons has blue-green foliage that matures to purple-red. Flowers are smoky-purple and reach 4'. Ruby Ribbons is the controlled cross of 'Heavy Metal' and 'Haense Herms'. Ruby Ribbons is patented and priced higher than the other cultivars.

'Shenandoah' is one of the best red switch grasses. Blue-green foliage turns red by late June. Reddish-pink flowers turn beige as they mature.

Fountain Grass

Fountain grasses prefer full sun and may not bloom as much in partial shade. May not be completely hardy throughout Zone 5. A vigorous, clump forming grass with bottle-brush like seed heads. The species is tall while the cultivars are more compact and some have differing seed head colors.

‘Hameln’ is the standard fountain grass, shorter, more compact and consistent than the species.

‘Little Bunny’ and ‘Piglet’ are miniature versions. ‘Piglet’ is a strong introduction that stays especially short and compact from Brent Horvath of Intrinsic Perennial Gardens.

‘Red Rocket’ is also an introduction from Brent Horvath of Intrinsic Perennial Gardens featuring dark red flower spikes.

P. alopecuroides ‘Red Head’ is maintained as field stock and can be grown upon request.

Schizachyrium	Native	Zone 3-9
Little Bluestem		

Little Bluestem grasses (formerly classified as *Andropogon scoparius*) are some of the hardiest ornamental grasses. Native to the Canadian Provinces and south through the US all the way to Arizona and Florida. Clumps of slender green leaves with blue bases feature purplish-bronze flowers. Leaves turn bronze-orange in fall.

Lodging is a technical term used to describe the tendency of some Schizachyrium to flop and lay over. This is quite natural in the species and can provide an interesting look in a prairie or mass planting but may not be what is expected in all settings. Newer cultivars are being bred to resist lodging as noted below. Lodging tends to be worse with heavy watering and high nutrient levels.

‘Blue Heaven’ was developed by the University of Minnesota. It is slightly taller and stays upright when most others lodge. Blue-gray foliage turns burgundy in fall.

‘Carousel’ is a Chicagoland Grows® introduction selected for its compact, rounded habit. Upright green stems with touches of pink. Insignificant flowers.

‘Jazz’ is a sport of ‘The Blues’ selected by Brent Horvath of Intrinsic Perennial Gardens for its shorter form. Less prone to lodge. Blue foliage turns purple in fall and features purplish flowers.

‘Standing Ovation’ has wider leaves that are blue with red tips. Foliage turns reddish maroon in fall and doesn’t brown out. Seldom lodges.

‘The Blues’ has slender blue leaves with pinkish stems. Purplish flowers appear in August and foliage turns burgundy-red in fall. Lodges.

Perennials

RECOMMENDED PLANT SPACING:

<u>Spacing</u>	<u>Common plant sizes</u>	<u>Square feet per plant</u>
6" centers	32ct.	.25 sq. ft.
8" centers	32ct.	.44 sq. ft.
10" centers	32ct., 24ct., 18ct.	.69 sq. ft.
12" centers	32ct., 24ct., 18ct., 10ct.	1.00 sq. ft.
15" centers	18 ct., 10ct.	1.56 sq. ft.
18" centers	#1, #2, #3 container	2.25 sq. ft.
24" centers	#1, #2, #3 container	4.00 sq. ft.

Generally perennials are spaced 12-24" apart. The distance between the plants is based on the size of the plants used, the expected growth rate, and the budget that the installer has to work with.

$$\text{sq. ft. of job} \div \text{sq. ft. per plant} = \text{number of plants required}$$

Example: 1,000 square feet using 32ct flats planted on 6" centers

$$1,000 \text{ sq. ft.} \div .25 = 4,000 \text{ plants}$$

$$4,000 \text{ plants} \div 32 = 125 \text{ flats}$$

Achillea **Zone 3-8**Yarrow 

Fragrant, fern-like foliage with showy flower heads. Excellent for use in dried flower arrangements. Yarrow does well in hot, dry conditions.

'Moonshine'	yellow	12-24"	Jun-Sep
'Oertel's Rose'	rose-pink to white	12-15"	
millefolium 'Paprika'	red	18-24"	Jun-Sep

38ct..... .88 (33.44/flat)

#1 container..... 4.85

Other sizes can be grown upon request.

Actaea (Cimicifuga) **Zone 3/4-8**Bugbane, Black Snakeroot 

Cimicifuga racemosa has been reclassified as *Actaea simplex*. Loose bushy plants with sets of serrated, deeply veined leaflets. Long, dense, upward facing, bottlebrush-like spikes of fragrant flowers. All three cultivars have dark purple foliage but 'Brunette' is hardier (Zone 3), Chocoholic has pinkish flowers, and Hillside Black Beauty is taller. Due to the size of these plants we only grow them in #2 pots.

'Chocoholic' (PP# 24,821)	mauve pink	36-48"	Z4	Aug-Sep
simplex 'Brunette'	white	36-48"	Z3	Aug-Sep

------------------------------------	--------	--------	---------

#1 container..... 7.05

Alchemilla **Zone 3-7**Lady's Mantle 

Fuzzy green leaves trap morning dew in reflective droplets. Can self-seed and works well in mass plantings, or even as a groundcover.

mollis 'Thriller'	yellow green	12-24"	June
-------------------	--------------	--------	------

18ct..... 2.10 (37.80/flat)

#1 container..... 4.85

Other sizes can be grown upon request.

Allium	Native	Zone	2/3/4/5-9
--------	--------	------	-----------

Ornamental or Wild Chives/Onions/Garlic, Nodding Onion

Useful in rooftop applications for their drought tolerance while adding height and character above the typical *Sedum*. Gaining popularity in at-grade landscape applications as well.

A. cernuum (nodding onion, hardy to Zone 4), is native to North America. Also known as Nodding Onions, they are showy in the landscape.

‘Millenium’ (hardy at least to Zone 5) is nearly identical to ‘Summer Beauty’ but we have found it usually blooms a few weeks later making them excellent choices to plant together for extended bloom time. Perennial Plant of the Year for 2018

A. senescens ‘Blue Eddy’, a selection of *A. senescens* subsp. *glaucum*, has blue-green to gray-green whorls of foliage resembling water eddies with lavender-pink flowers. The species (*A. senescens* subsp. *glaucum*) is similar, but not as consistently blue.

‘Summer Beauty’ (hardy at least to Zone 5) has become the standard in *Allium* plantings due to its vigorous and reliable performance. Combines nicely with ‘Millenium’ (see above) due to similarity, but differing bloom times for extended color.

A. thunbergii ‘Ozawa’ is a fall blooming Japanese onion with purple-pink flowers.

‘Windy City’ (hardy at least to Zone 5) is a new introduction by Brent Horvath of Intrinsic Perennial Gardens with a deeper purple bloom.

senescens ‘Blue Eddy’	lavender-pink	6-12”	Z4	Aug-Sep
s. subsp. <i>glaucum</i>	lilac to lavender	6-12”	Z4	Jul-Aug

A. ciliata var. tenuifolia 'Verdant Venture' (PPAF): Twixwood has started production of this cultivar. May have limited or late availability in 2021.

Anemone	Native	Zone 3/4/5-8
Windflower, Japanese Anemone, Snowdrop Windflower		 
Prefers rich, well-drained soil in moist, semi-shaded areas. Anemones are spreading perennials that make great groundcovers, especially the North American native <i>canadensis</i> species (Zone 3) and the European native <i>sylvestris</i> (Zone 4). 'Honorine Jobert' (Zone 4) is also known as 'Alba' and sometimes sold under the species name <i>japonica</i> instead of <i>hybrida</i> and features single white flowers. 'Robustissima' (Zone 4, maybe even 3) is commonly called Grapeleaf Anemone and features single light pink flowers.

Asclepias	Native	Zone 3-9
Butterfly Weed, Butterfly Milkweed, Swamp Milkweed		

An important food source for Monarch butterflies.

A. incarnata is the tall pink milkweed commonly called Swamp Milkweed. ‘Cinderella’ is similar, but probably a bit shorter and pinker blooms. As the common name implies, prefers moist soil, but is surprisingly tolerant of average, well-drained soils.

A. sullivantii is commonly called Prairie or Smooth Milkweed. This native prefers moist prairie areas such as river bottomlands and is similar in appearance to Common Milkweed.

A. syriaca (Common Milkweed) has larger blooms and smooth stems. This native grows in drier areas and is even somewhat drought tolerant.

A. verticillata (Whorled Milkweed) has needle-like leaves in whorls at each node along the stem. This native also prefers drier native areas and is drought tolerant.

A. tuberosa has yellow-orange flower heads in summer and the ‘Gay Butterflies’ cultivar is even more colorful. This species is native to the uplands and is more drought tolerant.

Aster - See Eurybia

Astilbe**Zone 4-9**

False Spirea

Feathery flower heads provide color from spring into summer. Astilbes prefer moist, semi-shady conditions and are great with hostas and ferns. Some varieties such as 'Fanal' and 'Maggie Daley' are considered hardier (Zone 3.)

We have chosen to alphabetize this list by cultivar name rather than species and to abbreviate the species names: a = *arendsii*, c = *chinensis*, j = *japonica*, s = *simplicifolia*. There is often disagreement over the species name and it may be best to leave them off altogether. We have also chosen to use the English names with the German in parentheses in most cases. 'Pumila' should probably be categorized as a subvariety, not a cultivar: *A. chinensis* var. *pumila*.

a. 'Bridal Veil' ('Brautschlezer')	white	18-36"	Z3	June

*Due to some inconsistencies, Twixwood is switching seed suppliers. The new supplier calls their seed ‘Magnus Superior’ because it has gone through a more careful selection process to ensure the quality and consistency you expect. During this transition year (2021) both will be available and we will ship whichever looks best at that time.

E. tennesseensis is maintained as field stock and can be grown upon request.

Continued on the Next Page

Echinacea (Continued)

These patented hybrids receive a lot of marketing, so are often requested by your customers. Some are unique colors or double bloomers, but many don't perform as well as the less expensive standards. We keep trialing them as they come out and keep going with the ones that perform well, but use with caution until performance is proven.

The Kismet® Series come from the Terra Nova Nursery breeding program and we think they are particularly adapted to the landscape market.

The performance of the Sombrero® Series has stood out above the others in trials and in our own experience. Sombrero® Baja Burgundy even won the first ever All American Selections (AAS) performance award for perennials for 2020 (See also Rudbeckia American Gold Rush).

Eupatorium (Eutrochium)	Native	Zone 4-8
-------------------------	--------	----------

Joe-Pye Weed

These plants are being reclassified. 'Little Joe' along with the native *E. purpureum* (Joe-Pye Weed) is now going under the genus name *Eutrochium* still with the *dubium* species. 'Summer Snow' is a white-flowered cultivar developed by the Chicago Botanic Garden.

'Milk & Cookies' has chocolate red foliage with milky white flowers. 'Polished Brass' foliage emerges red like its seed parent 'Milk & Cookies' but the leaves are glossy and it is a larger plant.

dubium 'Little Joe' (PP# 16,122)	mauve-purple	48-60"	Jul-Sep
maculatum 'Summer Snow' (PP# 31,128)	white	48-60"	Jul-Aug
perfoliatum 'Milk and Cookies'	white	36-42"	Jul-Aug
'Polished Brass'	pink	48"	Jul-Sep

Eutrochium - See Eupatorium

Ferns	Native	Zone 3/4/5-8
Ferns		 

Athyrium filix-femina (Lady Fern) has lacy green leaves. Grows in tall clumps. Native.

Athyrium nipponicum 'Pictum' (Japanese Painted Fern) produces fronds that are soft silvery-gray with hints of red and blue. Probably more accurately named *A. nipponicum* var. *pictum*. May be hardy to Zone 3.

Dryopteris erythrosora (Autumn Fern or Japanese Shield Fern) has coppery fiddleheads which open to golden-green fronds turning a coppery color that deepens in fall.

Dryopteris marginalis (Leatherwood Fern) is a very adaptable fern with evergreen foliage. Also called Marginal Wood or Marginal Shield Fern. Native.

Dryopteris remota (Remote Wood Fern) is a vigorous grower. The species name, *remota*, means scattered. As *Dryopteris* ferns are often given common names of Wood, Shield or Buckler it could also be called Scattered Wood Fern, etc.

Matteuccia struthiopteris (Ostrich Fern) is a popular large, vase-shaped fern with tall, erect, gracefully arching, dark green fronds. Typically 2-3', but can reach 6'. Native.

Osmunda cinnamomea (Cinnamon Fern) has yellowish green fronds with cinnamon colored fibers at the base of the plant which are used in potting Orchids. Native.

Polystichum acrostichoides (Christmas Fern) is an evergreen fern with glossy fronds. Native.

#1 container..... 8.20

Due to high demand and a longer lead time for full maturity, some varieties may have late or limited availability in 2021.

Geranium	Native	Zone 3/4/5-8
----------	--------	--------------

Hardy Geranium, Cranesbill, Spotted Geranium

Dependable perennials that work well as groundcovers or individually. Foliage is green and often turns reddish in fall except for 'Dark Reiter', which has chocolate colored foliage year-round. The *maculatum* species is native as are the parents of several others.

'Rozanne' was the 2008 Perennial Plant of the Year®. It continues to be in high demand because of its excellent performance. Sometimes also called 'Gerwat' or 'Jolly Bee'.

Heuchera**Zone 3/4-8**

Coral Bells, Alum Root

Semi-evergreen, clump forming foliage plants. Foliage color can vary depending on sun exposure. Some do better with more shade; especially the lighter colored varieties.

The cultivars in the first groups of lower priced *Heuchera* are the standard, tried and true varieties you can count on. 'Autumn Bride' is a large, green plant similar to the villosa species.

The higher priced, patented varieties are newer and less consistent in their performance. Some do not seem as hardy or otherwise environmentally adaptable, but the colors and foliage options are fascinating enough to be worth trying a few. We do not have room for descriptions that do justice to each variety so we encourage you to look them up online or ask us for more information.

F = Indicates a fragrant Hosta. Intensity of fragrance can vary greatly depending on variety and habitat.

○ = Indicates this Hosta has shown greater sun tolerance. All hostas prefer shade, the ones marked here can take sun much of the day. Many others can take a few hours of sun especially in the morning. Colors and patterns can vary with differing amounts of sunlight.

Size: S = Less than 12" M = 12-24" L = Larger than 24"

Iris	Native	Zone 3/5-9
------	--------	------------

Siberian Iris, Southern Blue Flag

Siberian Iris are as hardy as the name suggests (Zone 3). 'Caesar's Brother' is a deep blue.

The native, *virginica shrevei* (hardy to Zone 5), occurs naturally in sunny marshes, wet prairies, and savannahs. This fragrant flower grows in water up to 1' deep. Great for edges of ponds and streams.

Lavandula	Zone 5-9
-----------	----------

English Lavender

An exquisite plant for the herb garden or sunny border. Its silvery-green foliage creates a desirable accent. Prefers light soil and fairly dry conditions. 'Phenomenal' was named a 'Must-Grow Perennial' by Better Homes & Gardens. Reportedly handles heat and humidity better than other varieties, and may even be harder (Zone 4). In northern climates, it typically stays shorter than sometimes advertised.

May have limited or late availability in 2021.

Monarda **Zone 4-9**

Bee Balm, Bergamot 

Great for the cutting, hummingbird and butterfly gardens. Does best in a moisture-retentive, rich soil with sunny, open conditions. Several of these cultivars (generally considered hardy to Zone 4) are often sold under the species name of *didyma* in reference to the native *didyma* parentage of most of the hybrids.

Nepeta **Zone 3/4/5-8**

Catmint

Gray-green foliage is complimented by soft lavender-blue flowers. The taller varieties tend to fall over and spread across the ground unless staked. Trim to rejuvenate and extend flowering. ‘Walker’s Low’ was the Perennial Plant of the Year® in 2007.

There is some variation on the species names for the different varieties. ‘Walker’s Low’ and ‘Blue Wonder’ should probably be *racemosa* species, but are often sold as *faassenii*. *Faassenii* is a sterile hybrid of *racemosa* and *nepetella*, so should be designated *x faassenii* on ‘Kit Cat’.

Little Trudy® is truly a dwarf catmint, one of the most compact and consistent we’ve ever seen.

All varieties are not maintained in all sized, but can be grown upon request.

Phlox Zone 3/4/5-8

Garden Phlox, Tall Phlox, Woodland Phlox  

Traditional and indispensable perennial for use in virtually any landscape situation. Bright, colorful flowers over a long season offer a unique fragrance. Tall Phlox likes a rich, moisture-retentive soil. *Phlox divaricata* is the native woodland Phlox, with an intermediate habit. *Phlox paniculata* are the tall garden variety. Intermediate Phlox are bred, or selected, between or from other species. *Phlox subulata* are the creeping variety.

Platycodon Zone 3-8

Balloon Flower  

A beautiful addition to the front of a perennial border or mass grouping in a display bed. Flower buds are reminiscent of balloons before they open.

grandiflorus 'Astra Blue' blue 3-6" Jun-Aug

50ct Seed..... .75 (37.50/flat)

#1 container..... 5.40

Polygonatum **Zone 3-8**

Solomon's Seal

Green leaves edged in a broad strip of creamy white. Long, tubular, white flowers dangle from the axil underneath the leaves in early spring. Prefers moist woodland settings.

odoratum 'Variegatum'	white	24-36"	Apr-May
#1 container.....	9.25		

Pulmonaria **Zone 4-9**

Lungwort, Bethlehem Sage

A stand-out for moist, cool, shady areas. Dark green foliage with silver spotting. Protect from hot afternoon sun. May be okay in colder regions if kept in protected areas.

'Raspberry Splash'	raspberry-red	9-12"	Apr
'Trevi Fountain'	cobalt-blue	9-12"	Apr
#1 container.....	8.20		

Rudbeckia **Zone 3/4-9**

Black-Eyed Susan, Coneflower

One of the best perennials for long life, ease of care, disease resistance, and season-long beauty and color. The cut flowers and dried seed heads are second to none. 'Little Goldstar' is not considered as hardy (Zone 4.) Twixwood recommends 'Summerblaze'. It has narrower leaves like 'Viette's Little Suzy' and is more resistant to black spot (Septoria) than 'Goldsturm'.

'Goldsturm' (fuldiga var. sullivantii)	yellow	24-36"	Z3	Jun-Sep
'Summerblaze'	yellow	24-30"	Z3	Jul-Sep

#1 container.....	6.00			

All varieties are not maintained in all sizes, but can be grown upon request.

Salvia**Zone 3/4/5-8**

Meadow Sage, Wood Sage

Great for sunny borders, cutting beds, and dried arrangements. The textured foliage is often aromatic. Prefers full sun in a light acidic soil. Cutting plants back halfway at the end of June improves blooming and appearance.

Wood Sage (*x sylvestris*) is the result of a cross between *nemorosa* and *pratensis*. It is sold under various synonyms including *S. x alpestris*, *S. x asperula*, *S. x collina*, and *S. x superba*.

nemorosa 'Caradonna'	blue-violet	12-24"	Z4	Jun-Sep

All varieties are not maintained in all sized, but can be grown upon request.

Sedum	Native	Zone 3/4/5-9
Stoncrop		

Succulent-type perennials that prefer sunny, hot areas in a loose soil with good drainage. Sedum are especially susceptible to variations in color, habit, height, etc. depending on growing conditions, light, temperature, etc. They may change color frequently throughout the season.

The Sedum genus is so large it is being subclassified or reclassified. As these come into general use, Twixwood will note them as alternate names. Other genus or subgenus names you will see include *Hylotelephium*, *Petrosedum*, *Phedimus*, *Rhodiola*, and *Sinocrassula*.

All varieties not maintained in all sizes, but can be grown upon request.

*In production. May be limited or late availability in 2021.

Stachys

Zone 4-8

Lamb's Ear, Betony

Twixwood grows two quite different forms of the genus *Stachys*, each represented by different common names.

Lamb's Ear forms a clump of large fuzzy leaves and rarely flowers in the landscape. 'Helene von Stein', sometimes called 'Big Ears', belongs to this type.

Betony forms a clump of glossy green foliage and flowers profusely. Sometimes classified as *S. betonica* or *Betonica officinalis*. 'Hummelo' and 'Pink Cotton Candy' belong to this type as do Brent Horvath's two introductions from Intrinsic Perennial Gardens, 'Summer Crush' and 'Summer Romance'. *Stachys* 'Hummelo' was the 2019 Perennial Plant of the Year.

Both types of *Stachys* make excellent groundcovers in mass plantings.

o. 'Pink Cotton Candy' (PP# 21,436) is maintained as field stock and can be grown upon request.

Stokesia

Zone 5-9

Stokes' Aster

Stokesia is a North American native to the wet bottomlands and pine woods of the south. Peachie Saxton of Mississippi selected this cultivar for its longer and later bloom time. Deadheading extends bloom time. May require winter protection in Zone 5.

'Peachie's Pick'	blue	12-18"	Jun-Sep
#1 container.....	7.05		

Vernonia Zone 4-9

Ironweed 

This is an upright perennial that typically grows 2-4' tall on stiff, leafy stems which branch at the top. Narrow, linear to lance-shaped leaves up to 5" long have serrated margins. Flowers give way to rusty seed clusters. Blooms late in fall. Their purple flowers contrast nicely with the bright yellow of *Solidago* blooms. Excellent pollinator plants.

The *lettermannii* species of Ironweed is sometimes commonly called Smooth Ironweed. Generally grows taller in moist soils. The Summer Series are Chicagoland Grows® introductions selected for better performance and disease resistance.

lettermannii 'Iron Butterfly'	purple	24-36"	Jul-Sep

Twixwood Sales Yard

Twixwood Nursery maintains a Sales Yard at our main location for local (and sometimes not so local) customers who enjoy the one-stop shop experience. The Yard is stocked with a wide selection of Perennials, Groundcovers, Grasses, and Shrubs. We stock with a focus on popular items and our best looking Bud and Bloom, providing a small snapshot of what is available from our four farm locations. Many landscapers have designed for their jobs while shopping the Sales Yard and left with what they needed the same day.

Contact your local sales rep for more details on current yard availability. Walk-ins are always welcome.

yard@twixwood.com

Twixwood Nursery, LLC

P.O. Box 247

Berrien Springs, MI 49103

Phone: (269) 471-7408

Fax: (269) 471-2495 or (800) 854-1756

E-mail: info@twixwood.com

Web: www.twixwood.com

Terms & Conditions

THIS LIST CANCELS ALL OTHERS.

PRICES

All prices are F.O.B. Berrien Springs, Michigan. All advance orders are booked subject to prices and availability at the time of shipment. Prices are subject to change without notice.

CREDIT ACCOUNTS

Orders are accepted on a cash, company check (personal or third party checks may not be accepted), or credit card basis only, unless a confidential credit application has been submitted and approved by Twixwood Nursery. Terms for approved credit applicants are Net 30 to customers with established credit. Allow 4-6 weeks for processing the credit application. First orders for all new customers are by pre-payment only. A surcharge of 1.5% per month (18% per year) will be applied to unpaid accounts after terms from date of shipment. Payment on account may be applied to finance charges first.

DELINQUENT ACCOUNTS

Accounts not in good standing or significantly past due may have payment terms removed. Payment terms are not automatically reinstated and may require a new credit application process.

NON-SUFFICIENT FUND (NSF) CHECKS

A \$30 charge will be assessed for NSF checks.

CREDIT CARDS

Payment by Visa, Mastercard, and Discover is accepted. Please call the accounting department during normal business hours. Credit card information is not maintained for future use unless a form is filled out and signed by the customer allowing such information to be maintained through the end of the calendar year.

CREDIT BALANCES & WRITE OFF AMOUNTS

Twixwood reserves the right to write off any unclaimed credit balances under \$10 at the end of the calendar year.

LIMITED WARRANTY*

We warrant our plants to be true to name and to be in good living condition at the time of shipment. All other warranties are specifically excluded, including but not limited to the warranty of merchantability or fitness for intended use and any warranty regarding future

growth. Our warranty is limited to the seven day period immediately after delivery. All liability for incidental and consequential damages are excluded from this limited warranty. The following remedy applies and is your exclusive remedy: Limited warranty claims will be resolved by the replacement of defective plants only. All orders are accepted and shipments made subject to crop conditions and may be cancelled, prorated or changed based on availability at the time of shipment. (See Boxwood/Pachysandra note below.)

CLAIMS*

All plants become your property at the time of delivery. Plant claims that are covered by our limited warranty (see above, and Boxwood/Pachysandra note below) must be submitted in writing within 7 days of shipment. All honored claims will be resolved by the replacement of defective plant material only. Replacement plant material will be provided by Twixwood Nursery as soon as production plans permit and will be shipped at cost.

CHOICE OF LAW FORUM

It is agreed to by both parties that any contract for sale of goods and services made between Twixwood Nursery, LLC and the buyer is made in Michigan and shall be governed by Michigan law. Any action pertaining to such sale shall be venued in Berrien County, Michigan.

The buyer also agrees that in the event of non-payment of an overdue account, they shall be liable for collection charges, including reasonable attorney fees.

***BOXWOOD BLIGHT & PACHYSANDRA**

Twixwood is a participant in the Boxwood Blight Compliance Agreement. Our stock is regularly inspected and is clean. However due to these concerns, all Boxwood sales are final and Twixwood cannot accept returned or refused plants. Pachysandra is a host plant for Boxwood Blight although the blight apparently does not adversely affect the Pachysandra itself. However because of its ability to host the blight, Twixwood may also not accept refused/returned Pachysandra.

See additional information under the Shipping Information Section

Earned Volume Discounts

EARNED VOLUME DISCOUNT PROGRAM

Twixwood's Volume Discount Program is based on payment history and on purchases of the previous year. To qualify for these volume discounts your account must be kept current and there cannot be any outstanding finance charges. Discounts removed on delinquent accounts are not automatically reinstated.

Purchased Amount	Discount
\$7,500	6%
\$15,000	9%
\$25,000	12%
\$50,000	15%
\$100,000	18%
\$150,000	21%

As noted above, discounts may be reduced for historically delinquent accounts at Twixwood's discretion.

Shipping Information

FUEL SURCHARGE

Fuel prices are currently stable, but in the unexpected event of a spike, Twixwood reserves the right to add a fuel surcharge to cover such costs.

ROUTING & SPECIAL REQUESTS

All deliveries are subject to the scheduling of full trucks to a particular area and are routed according to the most efficient route. We make every effort to meet your requested needs, but we appreciate your understanding that this is not always possible. Please inform your customer service rep of your delivery needs, and any flexibility that will enable us to ship efficiently and keep our prices low for you.

RACKS

Twixwood primarily delivers on metal rolling racks. Racks are dropped (left on site) only at the discretion of Twixwood and with the understanding that they will be picked up with the next delivery or at another pre-determined time. Extending rack pick up as well as loss or damage to the racks can result in charges up to \$750/rack.

DETENTION FEE

Twixwood instructs our drivers to assist the customer in getting the plant material to the back of the truck for unloading. We do ask that the unloading be carried out efficiently so the driver can continue on his or her route without delaying other customers. Delays of more than 2 hours on site can result in detention charges up to \$100 per hour.

SHIPPING DAMAGE CLAIMS

All shipping damage must be noted at the time of receipt of the goods. Note any obvious damage or shortages in writing on the truck driver's invoice.

See Previous Pages for Warranty & Damage Claim Information

DELIVERY NOTIFICATION

We will attempt to notify you of deliveries one day in advance. Due to safety concerns and trucking regulations it is not always possible for drivers to notify you closer to delivery.

PICKUP

Twixwood maintains a sales yard beside the main office at 2759 East Shawnee Road, Berrien Springs, Michigan 49103. We attempt to keep it stocked with our better looking and more common items and encourage local wholesale customers to come and shop. To assure availability of specific items, please call and place an order according to the order deadlines noted on the next page. Orders not picked up within 7 days are subject to a restocking fee up to 20%.

ORDER DEADLINES

To ensure and maintain efficient and affordable freight and quality plants upon delivery, Twixwood maintains the following order deadlines. While we make every effort to service our customers, outside of these deadlines it does become much more difficult if even possible, at least without additional charges. Trucks are not routed to all areas every day. Your Customer Service Rep can assist you with determining which days are most likely to have full trucks for your area.

All Times are Eastern Standard Time

Delivery Date	Order Deadline	Additions* Accepted Until**
Monday	1 pm Thursday	6 pm Thursday
Tuesday	1 pm Friday	6 pm Friday
Wednesday	1 pm Monday	6 pm Monday
Thursday	1 pm Tuesday	6 pm Tuesday
Friday	1 pm Wednesday	6 pm Wednesday

*Additions to existing orders. Adding new stops to a routed truck may not be possible.

**Additions are only accepted if we have enough time to get them ready and there is enough room on the truck.

PLANT LABELS & TAGS

We will put one variety tag in each flat, #1 and larger container. Additional tags may be available for an additional charge. Please notify your customer service representative of additional tag needs. Custom UPC sticker printing is available for an additional charge.

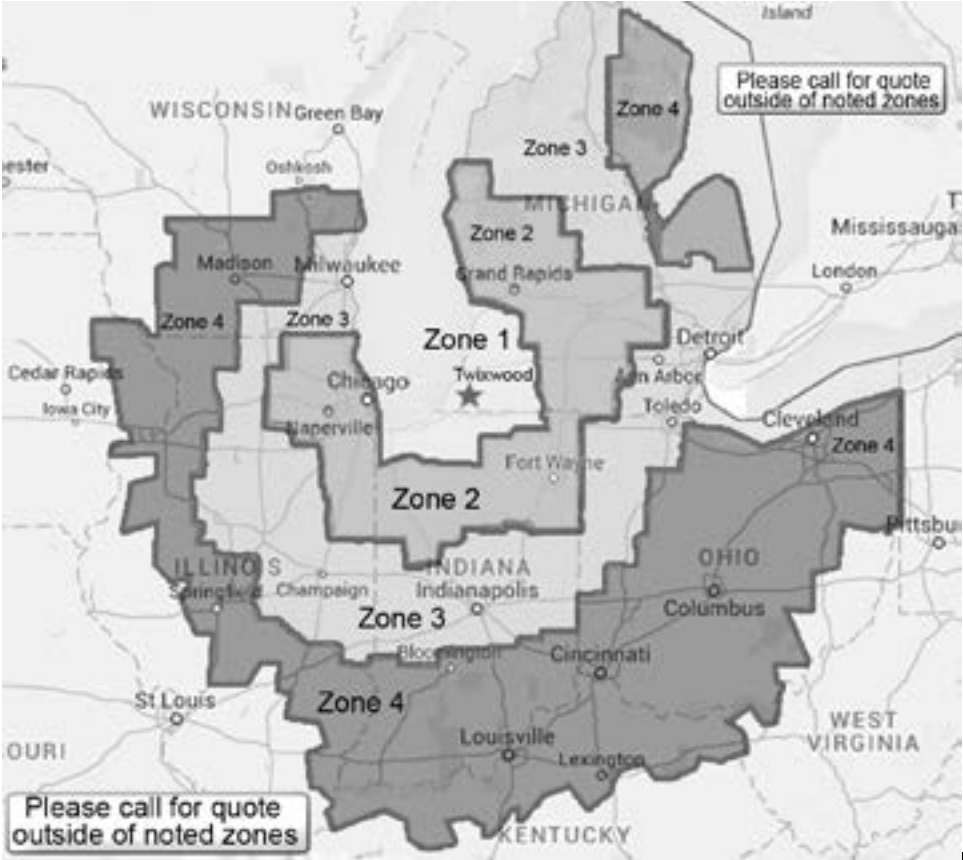

RESTOCKING*

Cancellations, adjustments or postponements to orders after the order deadlines noted above can result in restocking fees up to 20% of the order.

*See previous pages regarding Boxwood Blight & Pachysandra

See additional information under the Terms & Conditions Section

Shipping Zone Map

Shipping Zones

Zone	% Charge	Minimum Freight
1	5%	\$75 for Orders Under \$500
2	8%	\$75 for Orders Under \$500
3	12%	\$125 for Orders Under \$750
4	15%	\$200 for Orders Under \$1000

Freight percentages calculate on the order subtotal, after earned volume discounts are removed and before tax is added.

Shipping Zone Information Continued From Previous Page

Please refer to the map for shipping zones. Twixwood maps zones by County and Zip Code. Please call for your exact shipping zone.

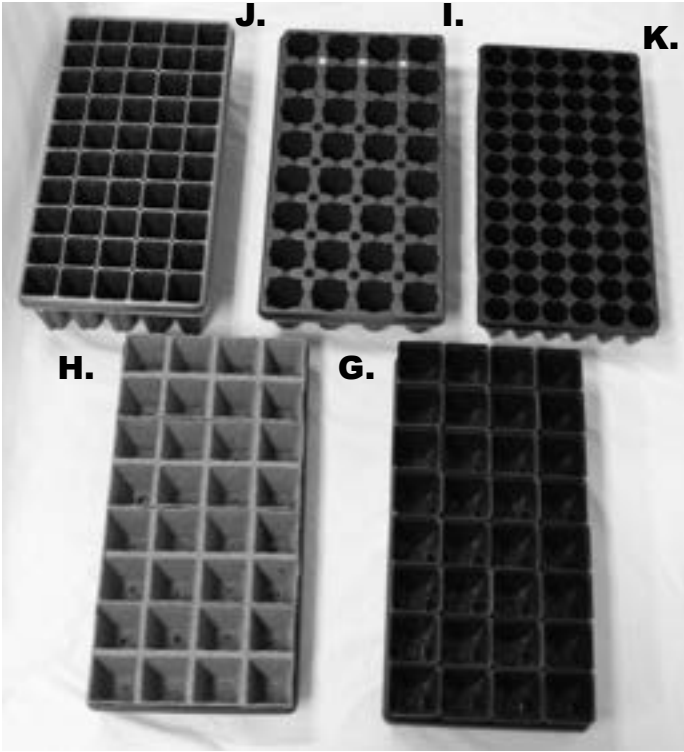

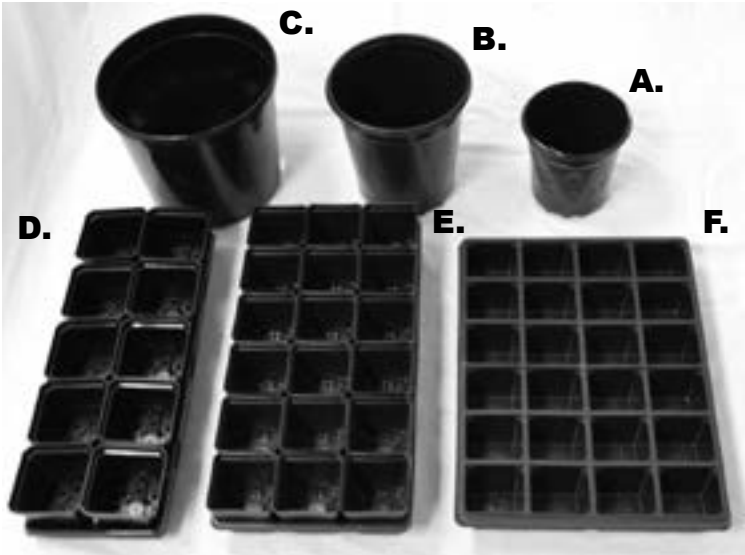

Zone	% Charge	Minimum Freight	Key Cities
1	5%	\$75 for Orders Under \$500	Michigan: Holland, Zeeland, Kalamazoo, Dowagiac, Cassopolis, Niles, Saint Joseph, Benton Harbor Indiana: South Bend, Elkhart, Goshen, Mishawaka, Portage, Gary, La Porte, Valparaiso, Michigan City
2	8%	\$75 for Orders Under \$500	Michigan: Ludington, Lansing, Grand Rapids and Battle Creek Indiana: Fort Wayne, Lafayette Illinois: Kankakee, Greater Chicago and suburbs, Joliet, Dekalb, Waukegan
3	12%	\$125 for Orders Under \$750	Michigan: Traverse City, Saginaw, Bay City, greater Detroit and suburbs, Ann Arbor Indiana: greater Indianapolis and suburbs, Terre Haute Illinois: Urbana, Champaign, Bloomington, Peoria, Dunlap, Rockford Wisconsin: greater Milwaukee and suburbs Ohio: Toledo
4	15%	\$200 for Orders Under \$1000	Indiana: Bloomington, Evansville Illinois: Springfield, Galesburg Wisconsin: Madison, Fond du Lac Ohio: Cleveland, Youngstown, Columbus, Dayton, Cincinnati Kentucky: Lexington, Louisville Iowa: Davenport, Dubuque

All Areas Beyond: Calculated per order on a truckload, LTL, UPS or Fed-Ex basis.

Once your order minimum is reached (\$500 in Zones 1 & 2, \$750 in Zone 3 and \$1000 in Zone 4), freight will calculate just on the percentage basis, not the percentage plus the minimum. This is an incentive to reach the minimum order amount.

FedEx: These delivery zones and rates are based on full trucks. If trucks are not full, or for smaller orders, we may be able to send your order through FedEx and bill you accordingly.

Package Sizing

Container Specifications

	Size	Description	Approximate Dimensions				Legal Volume
			Cell			Tray	
			Diam-eter	Width	Depth		
A	#1	#1 Pot	6.50"	round	6.50"		2.50 qt / 2.37 L / Pot
B	#2	#2 Pot	8.50"	round	8.50"		6.00 qt / 5.67 L / Pot
C	#3	#3 Pot	10.41"	round	9.50"		11.16 qt / 10.60 L / Pot
D	10ct	10ct Flat	3.75"	3.75"	3.50"	7.5" x 19.9"	18.4 fl oz / 544 mL / Pot
E	18ct	18ct Flat	3.25"	3.25"	3.50"	11.0" x 20"	16.0 fl oz / 473 mL / Pot
F	24ct Standard	24ct Standard Flat	2.75"	2.75"	2.50"	13.5" x 18"	5.8 qt / 5.49 L / Flat
G	32ct	32ct Flat	3.00"	3.00"	3.50"	10.8" x 21.2"	9.50 fl oz / 250 mL / Pot
H	32ct Peat	32ct Peat Flat	2.25"	2.25"	2.25"	10.8" x 21.2"	5.49 fl oz / 162 mL / Cell
I	32ct Plug	32ct Plug Flat	2.00"	round	4.00"	11.0" x 21.5"	5.58 fl oz / 165 mL / Cell
*	38ct*	38ct Plug Flat	2.25"	round	5.00"	10.8" x 21.2"	6.70 fl oz / 195 mL / Cell
*	50ct Seed	50ct Plug Seed Flat	1.75"	1.75"	2.25"	11.0" x 21.2"	2.88 fl oz / 85 mL / Cell
J	50ct Plug Deep**	50ct Plug Deep Flat	2.00"	2.00"	5.00"	10.9" x 21.4"	6.59 fl oz / 195 mL / Cell
K	72ct Plug	72ct Plug Flat	1.50"	round	3.25"	10.8" x 21.2"	2.30 fl oz / 68 mL / Cell

Other sizes and variations on these tray configurations are used primarily for internal production purposes but may also occasionally be offered for sale. Weights and measures of those can be provided upon request.

*38ct and 50ct Seed flats are not pictured.

**Several 50ct Plug Deep tray styles are currently in use. The one pictured and described is the one preferred by Twixwood and generally offered for sale.

Notes

Map and Directions

Directions to Twixwood: 2759 East Shawnee, Berrien Springs, MI 49103

From Chicago take I-94 East to Bridgman, Michigan. Take exit #16 ("Red Arrow"), turn right (North) and go to the traffic light. Turn right (East) onto Lake Street and go 8 miles (Lake Street will change to Shawnee Road.) The Nursery is on the left (North) after Garr Road.

From Indianapolis take US-31 North of South Bend, Indiana. Take Michigan Exit 13 for Berrien Springs. At the end of the ramp, turn right (West) onto East Snow Road. Go 1.2 miles. Turn right (North) onto Red Bud Trail. Go 1.5 miles. Turn left (West) onto East Shawnee Road. The Nursery is on the right (North), 0.6 miles. The drive is just in front of the big gray barn.

From Detroit take I-94 west to exit #30. Turn left (West) onto U.S. 31 South/East Napier Avenue. Go 2 miles. Turn right (South) onto U.S. 31 South ("South Bend"). Take Berrien Springs exit #15. Turn right (Northwest) and go to the traffic signal. Turn left (South) onto Red Bud Trail. Go 2 miles to the 4-way stop. Turn right (West) onto Shawnee Road. The Nursery is on the right (North), 0.6 miles. The drive is just in front of the big gray barn.
